Reason there are fewer than three comparable properties

☒ **I, the agent or agent's representative for the property offered for sale, did not take the sale price of three comparable properties into account in determining the estimated selling price for the property because I believe that fewer than three comparable properties were sold within the relevant period.**

Explain the reason the agent or agent's representative believes that fewer than three comparable properties:

[*Insert N/A if there were three comparable properties*]

There are no directly comparable properties that have sold within a 10km radius that provide a reliable basis for comparison with 25 Ilfracombe Way, Paynesville. The property's combination of recent construction, substantial accommodation, extensive shedding and significant energy infrastructure places it in a segment of the market where comparable sales are limited.

Completed in 2024, the property comprises four bedrooms, two bathrooms and four separate living zones, offering a level of space and flexibility that is not commonly represented in recent local sales. The home is further enhanced by quality finishes, ducted heating and cooling with individual room controls, ceiling fans throughout the bedrooms and a comprehensive security camera system.

Externally, the property provides a double garage under the main roof together with a substantial 9.5m x 7m high-clearance shed incorporating its own toilet. This provides considerable additional storage, workshop and hobby space and adds functionality beyond that typically available with conventional residential properties.

The property also features approximately 15kW of solar panels and a 32kW battery system, representing a significant investment in energy infrastructure and providing an enhanced level of energy efficiency and potential ongoing running-cost benefits.

In the absence of directly comparable sales, consideration has been given to the property's 2024 construction, overall quality, accommodation, four living zones, substantial shedding, garage facilities and extensive solar and battery infrastructure. Based on these factors, an assessed market value of $935,000 is considered appropriate for the property in the current Paynesville market.

Sale outcome

The sale price of the property must be included in this section within seven days after the unconditional sale of the property unless an application for an exemption is pending or an exemption has been granted.
