Reason there are fewer than three comparable properties

I, the agent or agent's representative for the property offered for sale, did not take the sale price of three comparable properties into account in determining the estimated selling price for the property because I believe that fewer than three comparable properties were sold within the relevant period.

Explain the reason the agent or agent's representative believes that fewer than three comparable properties:

[Insert N/A if there were three comparable properties]

There are only 2 recorded sales within the last 6 months & 2km, they are their own block and not part of a subdivision and larger in land size, one looks to be sloped slightly therefore the agent determined the selling price to be within the range of the 2 sales.
